“Casey and I enjoyed your class. It’s the first time that I’ve seen a class that individualized the needs of the participants. Individualized to the point that you take the participant on a journey from where they are at and do it with a great amount of enthusiasm and patience. Society could really learn from the way this class has been taught. The class isn’t just about learning stop motion animation, it’s about expressing someone’s creativity and truly appreciating what that story looks like. The icing on the cake is that it’s done with the participant feeling joy about what they’ve accomplished and everyone celebrating that. It is truly a class that embraces the awesomeness of the individual.”
